

This does not constitute tax advice. All persons considering use of available incentives should consult with their own tax professional to determine eligibility, specific amount of benefit available, if any, and further details.

## STATE OF VIRGINIA

### Dominion Virginia Power Charging Rate Reduction

**Short Description:** Dominion Virginia Power (Dominion) offers discounted electricity rates to residential customers who charge electric vehicles during off-peak hours.

**Beneficiary:** Dominion customer who charges an electric vehicle

**Type of Incentive:** Reduced rate for electricity

**Effective Dates:** Current Benefit, expected to expire on November 30, 2016

**Value of Benefit:** Not specified

**Full Description:**

Virginia Dominion Power offers two rates for residential customers who own qualified PEVs, the Electric Vehicle Pricing Plan and the Electric Vehicle + Home Pricing Plan. The Electric Vehicle Pricing plan allows PEV owners to take advantage of lower rates during off-peak hours. Under this plan, customers must install an additional meter specifically for their electric vehicle supply equipment (EVSE); Dominion will provide this meter at no charge. The Electric Vehicle + Home Pricing Plan is a whole-house pricing plan in which the customer's EVSE is treated as another appliance. Dominion will provide a new meter at no charge to record energy usage in 30-minute intervals, allowing Dominion to apply pricing based on time of day and encourage customers to charge their PEV during off-peak hours as much as possible. PEV pricing plans are expected to expire on November 30, 2016. For more information, see the Virginia Dominion Plug-In Electric Vehicles, Electric Vehicle Pricing Plan, and Electric Vehicle + Home Pricing Plan website.
