Nissan Intelligent Mobility moves you one step ahead. In cars that feel like an extension of you, helping you see more and sense more, reacting with you, and sometimes even for you. Nissan Intelligent Mobility is about a better future - moving through life with greater confidence, excitement and connection to the world around you.

Dry carbon fiber requires specific maintenance. Please see your Owner’s Manual for details. Extra cost option. Leather appointments. Always use appropriate tire for weather conditions. See Owner’s Manual for details. Nissan’s use of appropriate tires could reduce an accident resulting in serious injury or death. Vehicle Dynamic Control cannot prevent collisions due to abrupt steering, rear-ends, or dangerous driving situations. Always use appropriate tire. Tire service and equipment, subject to third-party service availability. For more information see NissanUSA.com/savemoney/guide. New program while driving. Off-road mapping may not be detailed in certain or other remote locations. Nissan dealer or contact Nissan North America, Inc. for details. Nissan also may not detect every object and does not eliminate all situations or errors of judgment. See Owner’s Manual for details.

Question everything. Get better answers. The 2021 Nissan GT-R® rewrites the laws of aerodynamics and makes the air your ally. ATTESA E-TS® All-Wheel Drive redefines supercar performance to give you four-season thrills. It proves you can outperform mid-engine exotics and have four seats, a handcrafted interior, even a trunk. This is tech that breaks from convention and shatters records. This is tech that moves.
Taking advantage of the capabilities of Nissan GT-R requires your attention, but it should never feel like information overload. The GT-R’s intuitive dashboard design makes access and use simpler, giving you more time to focus on what’s important – the pure enjoyment of the drive.

5 customizable performance screens
Display Commander media controller
Steering wheel-mounted paddle shifters

A sharper focus on driving

Taking advantage of the capabilities of Nissan GT-R requires your attention, but it should never feel like information overload. The GT-R’s intuitive dashboard design makes access and use simpler, giving you more time to focus on what’s important – the pure enjoyment of the drive.

Aerodynamic alchemy

Rather than being confined by the demands of aerodynamics, the Nissan GT-R sculpts the air to its needs – becoming a force of nature, as much as a force to be reckoned with. Every aerodynamic detail was considered. A 1% energy loss around the C-pillar was enough for the GT-R’s fanatical engineers to redesign the pillar to create a cleaner design.

565 HORSEPOWER

Each GT-R® engine is assembled by a single craftsman – called “Takumi” – renowned for their dedication and mastery. And with only five Takumi in the world entrusted with the honor, the plaque on the engine bearing their name has true significance. As one of the Takumi says, “we put our souls into each engine, hoping to deliver that excitement to customers.”

Mastery at every touchpoint

The GT-R’s interior is a masterful blend of premium materials, from hand-stitching in the cabin to a dashboard pad created from a single, hand-selected Nappa leather hide. Subtle etching on the aluminum bezels enhances their feel, while sport seats provide comfort and support, creating an ideal place to take it all in.
Ultimate Nissan vehicle, ultimate GT-R, ultimate supercar. Combining the amazing performance of the GT-R and the passionate engineering of the legendary racing arm of Nissan, you have the 2021 Nissan GT-R NISMO, a bold step beyond ultimate.

Under the hood, 600 horsepower is delivered by turbos from our GT3 racing program for incredible response across the rpm range. On the outside, carbon-fiber on the roof, hood, and fenders reduce weight and bring the center of gravity lower, closer to the center, to enhance stability and provide more responsive handling. Vents on the front fenders increase aerodynamic downforce for sharper turn-in.

Connecting you to the road is a competition-bred suspension working through unique 20” NISMO wheels and special-compound tires to take handling to the next level.

Inside is as beautiful as it is focused, with Recaro® seats, an Alcantara®-wrapped steering wheel with red leather stripe at 12 o’clock, and signature NISMO red throughout the cabin, including the seatbacks, tachometer face, shift lever, and door handle pulls.

Incredible power requires incredible braking. The Nissan Brembo® Carbon Ceramic Braking System brings massive stopping power and enhanced fade resistance.

481 lb-ft of torque
0.26 coefficient of drag
NISMO unique 9-spoke wheels
NISMO carbon-fiber body kit
