

This does not constitute tax advice. All persons considering use of available incentives should consult with their own tax professional to determine eligibility, specific amount of benefit available, if any, and further details.

STATE OF CALIFORNIA

Pacific Gas & Electric Rate Reduction

Short Description: Pacific Gas & Electric (PG&E) offers discounted Residential Time-of-Use rates for electricity used for plug-in electric vehicle charging.

Beneficiary: PDG&E customer who charges an electric vehicle

Type of Incentive: Reduced rate for electricity used

Effective Dates: Current benefit, no sunset date

Value of Benefit: Reduced rate for electricity

Full Description: In order to support the growing adoption of electric vehicles (EVs), Pacific Gas and Electric Company (PG&E) has introduced new simplified rate plans that are intended to help you better understand and manage your EV energy costs. There are two EV rate plans. With the first option, your EV charging costs are incorporated into your total household electric bill. Alternatively, you can opt to have your in-home charging station on a separate meter which will keep your EV charging costs distinct from the rest of your home. Unlike our other residential rate plans, the EV rate plans are not tiered. The price per kilowatt-hour (kWh) is based only on the time of day you use electricity-Peak, Partial-Peak and Off-Peak.

State Statutory References: Not Applicable
